Firewall/network changes	Option	Option	Option	Option
Customer training	Y	Y	Y	Y
Command user interface training	Option	Option	Option	Option
Configuration		Y	Y	Y
Cables supplied with 25-year warranty on cable installation.				
Note: All packages are subject to a scoping call and a Scope of Works being drawn up and signed by the end client.				

Site Survey: Consists of site visit prior to work to assess the requirement inform the System Design. Information related to the layout of the site and physical network access points are available will be collected.

System Design: The layout and positioning of the cameras will be designed into a document to display and be agreed upon by the customer.

Installation: The cameras will be fitted based on the System Design and to manufactures specifications.

Wire & Cabling: The camera's cabling will be managed and routed into the network in line with the System Design. Including CAT6 cables, patches, back-box, faceplate, consumables

Firewall/Network Changes: To allow for the Verkada Cloud connection from the cameras certain rule changes will need to be implemented.

Customer Training: Once the cameras are implemented and connected to the Verkada Cloud there will be training provided on how to setup the cameras and access their feeds, along with other features available on request.

Command UI Training: An overview of the "Command" feature of the product will be provided.

Configuration: A small number of the installed cameras will be configured as part of the Customer Training to demonstrate setup and inform the Command UI Training.
